
Licensing Application

OEM Technology Licensing Program

Autodesk® RealDWG™

RealDWG™ Overview

RealDWG™ technology is the software framework component that Autodesk software applications use to access, read and write DWG and DXF files. RealDWG™ 2006 provides the highest degree of compatibility possible with AutoCAD DWG files for the AutoCAD 2000i, 2002, 2004 and 2006 releases. Developers can take advantage of this framework to incorporate reading and writing DWG and DXF files in their applications by licensing the RealDWG™ Software Development Kit (SDK) from Autodesk.

Licensing Application Instructions

Before you can license the RealDWG™ SDK from Autodesk you must complete the following steps:

1. Save this Adobe PDF form to your computer. It can be filled out electronically.
2. Once you have completed this Licensing Application, email it to Tech Soft at: info@techsoft3d.com. Any questions regarding this form may be directed to the same address.
3. Tech Soft will submit this form to the appropriate parties at Autodesk for review and consideration.
4. Tech Soft will notify you of whether your application has been approved.
 - If approved you will be emailed a RealDWG™ contract to review and sign.
 - By signing the RealDWG contract, you agree to pay Tech Soft in full an initial license fee of \$5,000.00 US dollars for the RealDWG™ SDK and a one-year distribution license. Each year thereafter you agree to pay an annual licensing/upgrade fee of \$2,500.00 US dollars.
 - A purchase order or PO # must accompany your signed contract.

Technical Support Service:

Licensees of the RealDWG™ SDK have the option to enter into a Technical Support Service Agreement with Tech Soft for an additional fee of \$1,500 per year. Through this service, licensees will have direct access to a dedicated technical support engineers via phone or e-mail to answer questions and help resolve issues with implementation. This service is highly recommended for professional software developers to accelerate implementation of the RealDWG™ SDK as well as to help ensure optimal usage.

For additional information on Tech Soft's Technical Support Service please contact info@techsoft3d.com or call 1.510.883.2180.

RealDWG™ Licensing Application

This application outlines the information critical to a fast response and quick approval of your request to license RealDWG™ technology. The information in the application will help Autodesk understand your market and solution. **All information is kept strictly confidential.**

Submittal Date: _____

I. Background Information

Contacts and Location

Name of organization _____

Your name _____ Title _____

Address: _____

City _____ State/ Province _____

Zip / Postal Code _____ Country _____

Telephone _____ Fax _____

Email _____ Website _____

Other pertinent background information

1. Date Company First Established _____ State: _____

Corporation Partnership Sole proprietorship

2. Subsidiary information (if applicable)

3. Current relationship and position with Autodesk (check all that apply)

- | | |
|---------------------------------------------------------|-----------------------------------------------|
| <input type="checkbox"/> Autodesk Registered Developer | <input type="checkbox"/> Autodesk Reseller |
| <input type="checkbox"/> Autodesk Strategic Account | <input type="checkbox"/> Autodesk Distributor |
| <input type="checkbox"/> Autodesk OEM Partner | |
| <input type="checkbox"/> Independent Software Developer | <input type="checkbox"/> Other (explain)_____ |

II. Application Information

1. Application Name: _____

2. Detailed product description and application functionality :

3. Describe your application features that will require RealDWG™ technology?

III. Opportunity

1. Describe the market that your application will target.

2. Number of potential customers (companies). _____

3. Number of potential end-users (seats). _____

4. Select an Autodesk market segment that best suits your application.

- Building Design, Construction and Management
- Mapping, Civil, Geospatial and Infrastructure Management
- Manufacturing Design and Documentation or Process & Power

Competition

1. Names of competitive companies and their application(s).

2. Does the proposed application that will incorporate RealDWG™ technology compete, in any way, with functionality contained in Autodesk products? If yes, please explain.

IV. Technology Licensing Needs

1. Check all functionality that you will use from the RealDWG™ SDK

- | | |
|-------------------------------------------------|---------------------------------------------|
| <input type="checkbox"/> Read DWG | <input type="checkbox"/> Read DWG/DXF |
| <input type="checkbox"/> Write DWG | <input type="checkbox"/> Write DWG/DXF |
| <input type="checkbox"/> Create new DWG | <input type="checkbox"/> Create new DWG/DXF |
| <input type="checkbox"/> Other. Please explain: | |
-

2. Will you be interested or require consulting services from Autodesk to implement this project?
(Mark all that apply so we may present an estimate of services)

- Autodesk RealDWG specific training
- Consulting/Planning
- Technical Support
